

Overview

Baby Supplies Disinfection Cabinets – TDD-BSDC-20LB

TDD-BSDC baby supplies disinfection cabinets are designed for tableware, bottles, pacifiers, water cups, clothes and toys sterilization with drying. It not only sterilized all your baby products using UVC light, but also reduces the milky smell of bottles and soothers by decomposing the odor molecule, and could even increase the appetite of your baby. This multipurpose cabinet is a one stop solution for your kitchen. It can eliminate up to 99.9% of germs and bacteria from bottles, nipples, pacifiers, teething toys, small toys and breast pump accessories, which gives your baby more protection. The sleek and stylish design allows it to easily blend in any kitchen and comes in three colours for your liking. You can disinfect all your babies' products simply and effectively at the touch of a button. It incorporates an automatic sterilize, dry, deodorize and sterile storage function making it so simple to use.

The cabinet is equipped with ultraviolet (UV), hot air circulation and LED night light for sterilizing to kill germs and bacteria by destroying DNA & RNA. It can be widely applied to the disinfection of baby products, including nipples, disposable towels, underwear, toothpaste, baby bottles and toothbrush etc. at home, hospitals, kindergartens, thereby being beneficial to the prevention of pestilence and to the health of people.
